

**Tire Recycling & Household
Hazardous Waste Event
November 16th, 2013**

Prior to the Event, all ECO staff and Volunteers were given safety vests and a Safety Talk

**The View from the gate
at 8:59 a.m.**

**Gina signaling the customers at
9:00 a.m. that,
“The Gates are Open...
Let the Event Begin !!!”**

Once the gates were open for the Event, Maricopa residents came in by the car-load, truck-load and trailer-load with various household hazardous waste items.

Miss Stephanie and Miss Trudi were the traffic cops for the Event. They were also responsible for creating these unique, one-of-a-kind, hand-crafted signs, which provided a safe and efficient traffic flow experience for Event participants.

Maricopa residents were extremely grateful for being able to rid their homes of unwanted household hazardous wastes during the Event!!! Stericycle Specialty Waste Solutions took it all away...

Paint

CFLs, pesticides, refrigerant, aerosols, batteries, etc.

Pallets of paint, motor oils, and other liquid household hazardous wastes quickly accumulated during the Event.

Outgoing Materials Staging Area

Thanks for helping us off-load these TVs!

We received sooo many TVs, Computer Monitors, and other electronics during the Event, that our vendor, Westech Recyclers, couldn't fit them all on their commercial truck; they'll have to come back to pick-up a second load.

**The
Appliances
Recycling
Team**
volunteers got
their workout
during the Event
helping customers
off-load their
appliances.

Our **Tire Recycling Team** volunteers were responsible for helping each customer fill out the County required Tire Affidavit and count the tires as they were placed in the roll-off containers.

Although ECO advertises that the tires need to be without rims, we always get several with them.

This Maricopa resident called at closing time, but we waited for him after hours, because he helped clean these illegally dumped tires from the desert.

Thanks to the **Hogenes Family** for letting ECO use their farm for parking all of the worker vehicles and Stericycle's big rig...

The **Stericycle**
Specialty Waste Solutions Team
carefully loaded their truck with
the pallets of household
hazardous wastes....
They loaded....and loaded....

...and loaded...

...and loaded....

All loaded up, ECO is pleased to see Maricopa's household hazardous wastes leave our community !!!

**THANK YOU City of Maricopa for funding our
Tire Recycling & Household Hazardous Waste Event
for Maricopa !!!**
